# Ashwin Baskaran
*React Developer*

Puducherry, India | +91-8056936474 | ashwinbaskaran151213@gmail.com | LinkedIn

## Professional Summary

With nearly three years of front-end experience, I am a detail-oriented web developer who is passionate about crafting responsive web designs. I have a knack for creating reusable components that have substantially decreased the time required for implementing upcoming features.

## Technical Skills

**Languages** : JavaScript, Python, HTML, CSS
**Frameworks** : React.js, Node.js, Next.js
**Libraries and Tools** : Material UI, Redux, React Router, TailwindCSS, Styled Components, React Query, GraphQL, Visual Studio Code, Git, Sentry, New Relic, Heroku

## Experience

**Software Development Engineer** | *MountBlue Technologies Private Limited (Client : Airmeet)*    *October 2020 – February 2022*
  – Developed reusable and robust UI components using styled-components which is responsive for both web and mobile web.
  – Implemented a new feature called event duplication which drastically reduces the user's burden while creating an identical event.
  – Upgraded some of legacy code in the dashboard with new logic and reusable components.
  – Built first version of white labelling across the web application.

**Software Development Engineer - I** | *Airmeet Networks Private Limited*    *March 2022 – May 2023*
  – Served as a key member for second version of theme development which included integration of a new UI library for improved accessibility.
  – Revamped dashboard with new designs and restructured the code for better scalability.
  – Became proficient in Sentry and New Relic to resolve critical bugs in the production.
  – Integrated third party applications such as Typeform for web and mobile web.

**Freelance Software Developer** | *Muskytten Technologies Private Limited*    *September 2023 – February 2024*
  – Provided mentoring in JavaScript while concurrently serving as a team leader within the company, fostering collaboration and driving successful project outcomes through effective guidance and coordination.
  – As a frontend team leader, I developed a hospital application dashboard, leveraging modern technologies and agile methodologies to deliver a user-friendly interface and robust functionality, optimizing healthcare management processes.

## Education

Manakula Vinayagar Institute of Technology    **B.Tech in Mechanical Engineering** | CGPA : 7.4    *August 2015 – November 2019*

## Projects

**Clone of Splitwise** | *React.js, Redux, GitLab, Material UI, Node.js, Express, MySQL*
  – Implemented theme and responsiveness in the website for better accessibility.
  – Implemented backend for login, signup and managed state with Redux.
  – Built reusable UI components with adaptable color for scalability of the website.

**Memory Game** | *React.js, Redux, GitLab, Material UI, Node.js, Express, MySQL*
  – Implemented responsive design to ensure compatibility across all devices
  – Developed backend for fetching highscore among the users and storing the user data.
  – Implemented a color palette to ensure uniformity across the website.
